## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 31-34, 37 in-part (a-m and v) and 38-44, drawn to a transformed host cell, a polynucleotide and method of producing a protein.

Group II, claim(s) 35-36, drawn to a method of making an antibiotic.

Group III, claim(s) 37 in-part (n-q), drawn to a polypeptide.

Group IV, claim(s) 37 in-part (r-u), drawn to an antibiotic.

Group V, claim(s) 45-46, drawn to a method comprising activating non-proteinogenic amino acids.

Group VI, claim(s) 47, drawn to a method comprising modifying a host cell to enhance expression.

Group VII, claim(s) 48, drawn to a method comprising protecting a plant against damage from albicidin.

Group VIII, claim(s) 49, drawn to a method comprising obtaining agents useful for blocking expression of albicidin.

Group IX, claim(s) 50, drawn to a method comprising protecting a plant against phytotoxic damage from an antibiotic.

2. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: because Groups I-IX lack a special technical feature, for example, Groups I and III consists of a protein and the encoding DNA, respectively, and such is common of any DNA. Further, the Group IV has an antibiotic a separate product from Groups I and III. The methods of Groups II and V-IX are either alternative methods of using the first product or methods that do not use or make the first product. Under PCT Rule 13.1 applicant is entitled to the first product, method of using and making said product. Thus, these inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
